

3 Sensible Words About Natural Gas

Although the natural gas delivery system is safe, leaks do occur on occasion. Thankfully, they can usually be detected:

-  **Sight** Escaping gas affects the nutrients in soil, so discolored soil or dead vegetation near a pipeline may indicate a leak.
-  **Smell** Because the gas is odorless, a sulfur-based odorant is added to give it a rotten-egg smell that warns of its presence. Be alert for this odorant or any petroleum smell.
-  **Sound** Natural gas leaks may make a hissing or high-pitch whistling noise.

If you smell a natural gas odor or suspect a leak, leave the area immediately and call our emergency number, 1-800-432-0771.

Winter Safety Tips

Keep Meters Clear

Never tie (tether) pets to gas meters or use gas meters to hang garden hoses or other tools.

Keeping a clear path to your gas meter not only helps Delta employees trying to perform routine maintenance but also allows emergency responders quick access should the need arise.

Remove snow and ice from your natural gas meter with a broom or brush, but never kick or try to chip ice with a hard object.

Look up! Ice can break off of gutters and overhangs and damage a meter if struck, or ice can melt during the day and splash up into regulator vents then freeze again at night, which may lead to improper pressures.

Keep ignition sources at least 3 feet away from your gas meter and from appliance vents or intakes. Appliance flue products contain moisture, which could freeze in cold weather and also cause corrosion.

Never hang a light bulb near a meter for heat.

Gas meters with regulators require open air around them, **so never box in or wrap your meter with blankets.**

Delta Emergency Service: 1-800-432-0771

Available 24/7/365

Delta works around the clock to provide you with safe, reliable and affordable natural gas. If you think you smell gas, suspect a leak, or experience an emergency gas outage, fire or explosion, leave the area immediately and then call our 24/7 emergency hotline.

Ask to See ID

Always ask for ID when a Delta Customer Service employee visits your home.

All Delta employees drive Delta-marked vehicles and carry a photo ID with their name and the Delta logo on it. Please contact Customer Service at **1-888-427-7335** with any questions or concerns.

Keep Your Furnace Safe

Delta encourages you to have a qualified professional inspect your furnace to ensure it runs safely and efficiently.

An inspection helps ensure reliable heat and can prevent potential problems.

Your contractor should:

- + Test the thermostat.
- + Check the flue.
- + Visually inspect the heat exchanger, motor and vents.
- + Check the pilot light, unless your furnace features pilotless ignition.
- + Lubricate the blower motor.

You should:

- + Replace your furnace filters at least three times during each heating season.
- + Make sure your furnace heat registers are free of obstructions.
- + Don't store items near your furnace that might stop or restrict airflow.
- + Never store or use flammable products (including newspapers, flammable liquids or cleaning products) near your natural gas appliances.
